

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Liedson Tavares de Sousa Carneiro

Universidade Federal de Alfenas (Unifal), Minas Gerais, Brazil

liedson.tavares@gmail.com

I have been working as a volunteer PhD (Ecology, IB/USP, 2013-2017) researcher at the University of Alfenas (UNIFAL-MG), Alfenas, MG, Brazil, since 2017. I have experience in investigating bee ecology and pollination of crops and natural systems within both applied and evolutionary-ecological approaches. Recently, I directly contributed to the elaboration of the 1st Brazilian assessment report on crop pollination and pollinators linked to the Brazilian Platform of Biodiversity and Ecosystem Services (BPBES) and the Brazilian Network of Plant-Pollinator Interactions (REBIPP). This year (August/2019) I will start a Postdoc Junior (CNPq/PDJ), at the University of Pernambuco (UFPE) where I will develop a project on evolutionary ecology that aims to understand the evolution of floral traits mediated by bees as potential biodiversity generators.
