I'm a biologist, with a master degree in ecology. I have been working as a conservation practitioner since 2002. I am currently employed by ICMBio (Instituto Chico Mendes de Conservação da Biodiversidade) and a doctorate student at the Programa de Pós-Graduação em Meio Ambiente, an interdisciplinary doctorate program of the Universidade do Estado do Rio de Janeiro (UERJ). My project focuses on biodiversity monitoring at Serra dos Órgãos National Park. My challenge is to integrate different monitoring schemes, operated by different institutions, in one comprehensive and adaptive monitoring program for the Park that provides helpful information for the park's management. My research interests are biodiversity monitoring and conservation, protected area management, environmental management, landscape ecology, biogeography.
