

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Gabriela Brasci Berro

University of Campinas (UNICAMP), Brazil
gabi.berro@gmail.com

I was born in Jundiaí, a city in São Paulo state, and I grew up in a small farm... so I fell in love with nature very early on. I graduated in Biological Sciences at the University of Campinas, and have been working with plant ecophysiology, ecosystem ecology and as a Biology teacher. Currently, I am a Master's student in Ecology at the same university, and a member of the Ecosystem Ecology and Management Lab (LEME). My research aims at understanding the role of non-vascular epiphytes in the dynamics of carbon and nitrogen in tropical forests, as well as investigating possible distribution patterns of this group in forests with different degrees of human disturbance. Besides academia, I love swimming, books and embroidery.
