

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Caroline Picharillo

São Paulo University
carolinepicharillo@usp.br

Caroline Picharillo holds her bachelor's degree in Environmental Management and Analysis from the Federal University of São Carlos (2015), and her master's degree in Sciences from the São Paulo University (2018). Currently, she is a doctoral student in the postgraduate program in Environmental Engineering Sciences, at the School of Engineering of São Carlos, São Paulo University. Her research work is related to environmental policy tools, with special interest in economic incentives tools for biodiversity and ecosystem services conservation on private lands. Key academic interests also include the use of geotechnology to support decision making and environmental planning.
