

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Ana Maria Martinez

Research Associate, Las Nubes Project, Faculty of Environmental Studies, York University,
Canada
lasnubes@yorku.ca

Ana Maria received her Ph.D. in Education from York University. Her dissertation focused on climate change enactments in Post-Secondary Educational Institutions in Canada, specifically she explored how policy and praxis influence climate change curricula and curricula formation in educational institutions. Her previous work has gone from analyzing the behaviour and habits of Giant River Otters in the Colombian Amazon to exploring conservation and management strategies of endangered species of sea turtles in the Colombian Caribbean. Since 2016, Ana Maria is a Research Associate with the Las Nubes Project in the Faculty of Environmental Studies at York University in Canada. Her research interests seek to: (1) develop strategies for participatory monitoring in the Alexander Skutch Biological Corridor; (2) develop tools to support decision making at the institutional, local, and national levels; and (3) establish environmental education efforts that are tailored to the local biodiversity and needs. Ana Maria also holds a Master's in Environmental Studies (York University), a Specialization in Environmental Law (Externado of Colombia University) and a Bachelor's in Marine Biology (Jorge Tadeo Lozano University).
