

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Francisco Arenhart da Veiga Lima

Integrated Coastal Management Lab (LAGECI), Federal University of Santa Catarina (UFSC),
Brazil
franciscoveigalima@gmail.com

Geographer graduated at UFSC, MsC Coastal Management at the University of Las Palmas de Gran Canaria (ULPGC) Spain, and Phd Geography - Natural Resource Management at UFSC. My work experience is nearly 10 years, both public and private sector, and they are related on coastal management projects (state level), port development analysis (national level) and environmental impact assessment (local level).

During my career, I had the opportunity to study abroad in several times (Chile, Colombia, Mexico, United States, and Spain), which helped me to work with different professionals and learn new approaches and methodologies of coastal and marine studies and environmental management process and policies. I believe that I am very communicative person and I have experience working in multi-discipline teamwork.

My interests are related to coastal and marine studies, public policy building, environmental management tools, and sustainable coastal activities. I am very enthusiastic in learning new approaches, techniques and methods regarding building scenarios and modelling of Ecosystem Services, especially towards into an Ecosystem-Based Management (EBM).
