

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Rafaela Aparecida da Silva

Federal University of Goiás
rafaaps832@gmail.com

Doctorate in Ecology and Biodiversity at São Paulo State University (UNESP), Master degree in Agroecology and Rural Development at Federal University of São Carlos (UFSCar), Bachelor in Ecology at UNESP, Licentiate in Biological Sciences and Technician in Accounting. I am currently working at the Federal University of Goiás with a technical grant, developing the Payments for Ecosystem Services (PES) program in the municipality of Silvânia (Goiás, Brazil). I have skills in the development of human research techniques such as the elaboration and application of interviews, sustainability indicators, participative tools, debate arenas and socioeconomic diagnoses. I have research experience and interest in the socio-environmental area, with emphasis on agroecosystems, ecosystem services and politics. I have great interest in investigating how the human dimension, considering its perceptions, knowledge and practices with ecosystem services can help and be used as tools to reach biodiversity conservation.
