

## São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

### **Marco Aurélio Nalon**

Scientific Researcher at the Forestry Institute (the Secretariat of Infrastructure and Environment of the State of São Paulo)  
marcoanalon@gmail.com

I graduated in Physics from Pontifical Catholic University PUC-SP (1987) and a Masters in Forestry Sciences from the "Luiz de Queiroz" School of Agriculture - ESALQ / University of São Paulo - USP (2000).

Currently I work as a Scientific Researcher at the Forestry Institute, an agency of the Secretariat of Infrastructure and Environment of the State of São Paulo, as a specialist in geoprocessing applied to environmental studies.

My main activities are linked to management plans for conservation units and I am the coordinator of the Forest Inventory project, which has mapped the state's native vegetation cover since 1993, and is being updated in 2019.

Since 2016 I have coordinated the theme of Biodiversity in the Economic Ecological Zoning of the State of São Paulo, where I have carried out studies evaluating ecosystem services and their integration with public policies.
