Jan Danek (Honza) is a PhD student at the Charles University Environment Centre in Prague and his research is focused on implementing ecosystem services into policy and decision-making in the Czech Republic. He received his master's degrees in European Studies Focusing on European Law from Palacky University in Olomouc in 2010 and in 2015 in Social and Cultural Ecology from Charles University in Prague. In 2014 – 2016 he has been working at the Department of International Relations of the Ministry of the Environment and gained valuable experience in international relations in the environmental field. Since September 2016, he started working at the Department of the Human Dimensions of Global Change, CzechGlobe - Global Change Research Institute, Academy of Sciences of the Czech Republic. Honza is currently participating in several projects focused on ecosystem services research, from mapping and assessment to economic valuation and participatory modelling of ecosystem services values. Since February 2019, he is the principal investigator of a project focused on assessment and mapping of cultural ecosystem services in landscape.

Main research interests: Implementation of the ecosystem services concept in policy and decision-making, socio-cultural valuation of cultural benefits as well as other aspects of ecosystem services research, e.g. assessment, mapping, (economic) valuation, modelling, scenarios.
