

São Paulo School of Advanced Science on Scenarios and Modelling on Biodiversity and Ecosystem Services to Support Human Well-Being

Viviane Dib da Silva

Federal University of Rio de Janeiro (UFRJ) and International Institute for Sustainability (IIS).
dibviviane@gmail.com.

I have a degree in Biology from UFRJ and a Master's degree in Ecology from the same University. During my Masters, my studies focused on aquatic and ecosystem ecology, especially on the relationship between biodiversity loss and ecosystem functioning. I also have experience at the private sector, working for three years on a bioremediation of water bodies' project. Currently, I'm a PhD candidate at Postgraduate Program in Ecology - UFRJ, working under Professor Bernardo Strassburg's advising. I'm leading a project to develop a map of priority areas for restoration in the Brazilian Atlantic Forest based on water-related ecosystem services, as requested by the Brazilian Ministry of Environment. Also, I'm a research assistant at IIS; an organization based in the city of Rio de Janeiro that is dedicated to promoting the transition to sustainability, combining production requirements, environmental services and social development. Main research interest: I'm interested in Landscape Ecology; Forest Landscape Restoration; Ecosystem Services Modeling; Forest and Water Relationship; Water-related Ecosystem Services.
